

Paired Squares

Facilitator Moves

PROCESS

- Each member locates a partner.
- Each pair locates another pair, gathers materials, and sits together.

ALTERNATIVES

- Use the same principle with pairs 3 times.
- See Learning Partners.

TIPS

- Provide a simple task to do as soon as the new groups form. This helps to bypass moments of discomfort, particularly for introverted members, and serves as an inclusion activity for the group.
- Example: Share your concerns, ideas, and experiences relating to the next topic.
- Example: Recall the most useful ideas from the last topic.
