

Read and Example

Information Processing: Exploring and Discovering

PROCESS

- Letter people as A and B.
- Each partner reads the first paragraph.
- Pairs generate examples of this idea in action.
- A summarizes.
- Repeat the pattern, alternating the summarizing role.

ALTERNATIVES

- Structure as a trio with each person reading the paragraph, A and B giving examples and C paraphrasing and summarizing. Rotate roles.

TIPS

- Producing examples can be challenging for some individuals, so always have at least one pair generating examples.
