

Energy Sources Team Survey

Information Processing: Exploring and Discovering

PROCESS

- Team members individually respond to questions about their team.
- Tabulate scores for each energy source for each person.
- Use the data to dialogue about its meaning.

ALTERNATIVES

- Use either an electronic version or a paper version.
- It might be useful to calculate a mean, median, and mode.
- Use the instrument in a prescriptive manner to determine what actions might be taken to increase certain energy sources in the group.

TIPS

- Emphasize that the data is nonevaluative and serves as baseline impressions.
- Use the data to dialogue about its meaning.
- Consider the strengths of the group as well as discrepancies.
